

# Your hassle-free total laundry solution

## Quick facts:

### No need for detergent

For really tough stains, 1/8 the amount you would have used before installing the Laundry Pro® may be used.

### Makes clothes softer

Detergent and chemical build-up on clothing, towels, and linens can weigh them down. Over time, Laundry Pro® lifts out old detergents and restores natural bounce without fabric softeners.

### Easy to use

Laundry Pro® connects to your washing machine with standard hoses – no additional plumbing needed. Put clothes in your machine, set for cold water only, and reap the benefits. Blue status lights on the Laundry Pro® will tell you it's working.

### Eco-Friendly

Cold water only and no detergent or detergent containers make Laundry Pro® a better choice for getting the laundry done while promoting environmental sustainability.

### Made in the USA

Designed, engineered, and made in the USA for reliability and durability.

### Better for sensitive skin

No detergent, bleach, or chemicals eliminates the itching and irritation caused by detergents embedded in clothing and linens.

### Whiter whites, brighter colors

Laundry Pro® keeps clothes looking vibrant with the cleaning power of oxygen.

# The healthier smarter way to do laundry.

Finally – laundry without chemicals, fragrances, softeners, or hot water. In goes dirty clothing, linens, and cold water. Oxygen and ActivePure® Technology lift out the dirt and grime. Out comes soft, clean, fresh laundry.

Technology created for use on the International Space Station, adapted for your home

# Laundry Pro®

## the total laundry solution

Laundry Pro® is a better way to do laundry that is healthier for your family, easy on the wallet, and safer for the environment. This cold water laundry system uses activated oxygen to lift dirt and grime from the fibers of your laundry, preventing the growth of odor-causing bacteria and eliminating the need for detergent. **Rethink the way you do laundry.**

### Healthier for your Family

Are you tired of shopping around, hoping you have selected a fragrance-free, dye-free detergent that actually lives up to expectations and doesn't cause itching or redness? Eliminate the need for detergent and enjoy the benefits of a cleaning process that has been used for over a decade in hospitals, hotels, and laundromats right in your home.

Laundry Pro® uses ActivePure® technology, activated oxygen, and cold water to lift dirt, grime, and residue from the fibers of fabric. Clothing and textiles are left clean, soft, and fluffy. Fragrances and fabric softeners are no longer needed for fresh and squeezable towels and linens, keeping potentially irritating chemicals away from you and your family's skin.

### Safer for the Environment

Instead of leading oxygen-based powders that require hot water for activation, Laundry Pro® works best in cold water. Even better, it operates without any added chemicals, powders, bleaches, or soaps.

When you wash your clothes with detergent and bleach, the chemical-laden water goes down the drain and makes its way to the environment. The ActivePure® technology in Laundry Pro® infuses incoming cold water with cleansing oxidizers that bubble through the wash and break down into basic oxygen in a few minutes, leaving only water and dirt from your laundry to drain through the water waste system.

Even eco-friendly detergents come in boxes, cartons, and plastic containers. Laundry Pro® is a contained system that doesn't leave behind refuse from continuous purchases! Feel better about keeping more waste out of landfills.

### Easier on your Wallet

Did we mention that you won't need to buy detergent? Or use hot water? You'll save money with Laundry Pro®. Most of the cost incurred from doing laundry comes from heating water. Laundry Pro®, a cold water system, can knock that cost off your annual laundry bill. Factor in the money you can save on detergent, and your family can save \$500 a year. The Laundry Pro® will pay for itself many times over.

As a bonus, you'll notice the hidden savings of longer lasting clothing and linens that hold up better through repeated washes. Cold water is easier on laundry, and detergent build-up that weighs down fabrics will no longer be an issue.

With no need for maintenance, the Laundry Pro® is your hassle-free total laundry solution.

**Certified Space Technology**

Products and services that display the Space Certification seal are guaranteed to have originated from technologies that came from space exploration.

Laundry Pro® uses a variation of technology originally developed in cooperation with NASA to create a safe atmosphere for astronauts on the International Space Station. This technology is now available to protect you, your family, and your home.

## Frequently asked questions

**Does the Laundry Pro® get out tough stains without pretreating?** Tough stains could still require pretreatment.

**Does the Laundry Pro® work with all types of water including hard water?** Laundry Pro® will work with all household water qualities, but the better the incoming water quality the better the results. To improve results, if desired, use a water softener for hard water and/or a prefilter for chlorine.

**Will the Laundry Pro® work with commercial washing machines?** Laundry Pro® is designed for residential use only.

**What effects does Laundry Pro® have on elastic?** Normal operation of a Laundry Pro® unit should have no negative impact on elastic in clothing.

**Can I let my clothes soak overnight?** It is not recommended that clothes soak overnight in Laundry Pro® water.

## The smart solution for doing laundry

Laundry Pro® ensures that you aren't absorbing anything from the fabrics you touch, which helps you to avoid the allergic reactions that can be caused by detergents. Based on processes used for over a decade in hospitals, hotels, and Laundromats, Laundry Pro® infuses cold water with oxygen, peroxides, and other gases to bubble and lift dirt and grime from cloth fibers, leaving clothes brighter and cleaner.

### Specifications

Technology	ActivePure® Activated Oxygen
Power usage	0.4W (standby) 1.3W (operating)
Water pressure	min. 20 psi to 75 psi max.
Water temperature	use cold water only
Operating temperature	50°F to 100°F
Operating humidity	20% to 70%
Size	17.25" wide x 9.06" tall x 4.05 " deep

## No Detergent\*. No Hot Water. More Savings.

\*Note: Laundry Pro® reduces or eliminates the need for laundry detergent. While many users find that Laundry Pro® alone effectively cleans their laundry, you may find it necessary to pre-treat or use a reduced amount of detergent to remove certain stains. If you find that detergent is necessary, we recommend using 1/8th the amount you previously used before your Laundry Pro® purchase.
