

Everything you need to know about

# HOME COMFORT SYSTEMS

## SYSTEM COMPONENTS:

A home comfort system is made up of many integrated components that work together to provide efficient comfort for your home.

These components include:

- 1 Air conditioner or heat pump
- 2 Thermostat
- 3 Zoning system
- 4 Furnace or air handler
- 5 Air-filtration device
- 6 Indoor coil
- 7 Supply duct
- 8 Return duct

## OPTIONAL AIR QUALITY ACCESSORIES

Other components can be added to the home comfort system to help solve a range of indoor air quality issues. These solutions include:

- 9 Germicidal light
- 10 Humidifier and/or dehumidifier
- 11 HEPA filtration system
- 12 Ventilation system

# HOME COMFORT SYSTEM BUYING GUIDE

Get comfortable with Lennox before you make a purchase by checking out what others have to say about Lennox® products. Star ratings are provided for most products, and many owners leave helpful comments, too.

---

If you feel that Lennox is the right fit for you, here are some other things you might want to talk to your Lennox Dealer about:

## SIZING OF UNITS

If you've recently made energy-efficient upgrades to your home, you might benefit from smaller-size heating and cooling equipment. Your Lennox Dealer can recommend the right system size for your home and needs by performing a load calculation, which takes into account the square footage of your house, the insulation value of your windows, the amount of insulation in your walls and roof and many other factors.

## ENERGY RATINGS

For heating, energy ratings range from 80-98.7 AFUE.  
For cooling, energy ratings range from 13-26 SEER.

In both cases, the higher the number, the more efficient your system. Your Lennox Dealer can help you choose a matched system that will meet your comfort needs with optimum efficiency.

## SOLAR CAPABILITY

Only Lennox gives you the option of adding solar modules to air conditioners or heat pumps\* to reduce your heating and cooling bills by up to half.

*"The iComfort and iHarmony system that was installed in my home made for a complete upgrade with the rest of the system. ... My wife and I have an older home and this seems to be the smartest and most efficient change that we have made, I am sold as a Lennox customer for life!"*

PALESTINE, TX

\*Available with select premium models.

## INDOOR AIR QUALITY

Healthy Climate Solutions™ from Lennox offer many innovative and effective ways to improve the quality of your home's air. Solutions include air purification, humidity control and ventilation products.

## FINANCING

Of all the ways you can pay for your home comfort system, financing through one of Lennox' financial sources, both in the U.S. and Canada, may make the most financial sense. Flexible and hassle-free, Lennox financial sources offer:

- No Payments, No-Interest Financing
- 28 different loan types are available, so we can easily help find the custom solution that's perfect for you
- Financing plans are available for most levels of credit
- In most cases, credit applications are reviewed and approved in just seconds

## ENERGY STAR® CERTIFIED

ENERGY STAR is a U.S. government-sponsored program that guides customers towards purchases that save energy and help protect the environment. If an HVAC product is ENERGY STAR certified, it means that it exceeds federal guidelines for energy-efficient performance. And if a product is ENERGY STAR Most Efficient certified, then it has been recognized as one of the most efficient products that qualify for the ENERGY STAR label.

Lennox has a large range of ENERGY STAR and ENERGY STAR Most Efficient air conditioners, furnaces and heat pumps. In fact, Lennox has more ENERGY STAR Most Efficient products than any of our competitors. Energy-saving, Lennox ENERGY STAR certified products can help reduce your utility bills and may qualify you for federal energy tax credits and local utility rebates. Ask your Lennox Dealer about ENERGY STAR certified products for your home.

*Innovation never felt so good.®*
